OBJECTIVE

I'm a results-driven software engineer with a strong background in building interactive and user-friendly web applications, with proven hands-on experience, I've honed my skills in deep front-end and light back-end development, specializing in technologies like React, Node.js, Next.js and Express.js

Amazon Clone – E Commerce Website Development

Role: Full-Stack Developer

Tech used: Next.js (ReactJS), Tailwind CSS, Webhooks, Stripe API, Firebase, NextAuth

Project Description:

Led the development of an Amazon clone, a fully functional e-commerce website designed to mimic the core features and user experience of Amazon. This project aimed to provide a hands-on learning experience in e-commerce website development and showcase the ability to replicate a widely recognized platform.

Key Accomplishments and Contributions:

Leveraged Next.js for the entire project, handling both the frontend and backend aspects to replicate the user interface and design elements of Amazon.

Employed Firebase for efficient data management and user authentication, ensuring a robust database system within the Next.js environment.

Including user authentication, shopping cart, and payment processing with the Stripe API to ensure a secure and seamless shopping experience.

Experience:

In my previous roles at CenterBox Solutions, I've had the opportunity to work on a wide range of projects as an intern all the way up to junior, from e-commerce platforms to real-time chat applications. These experiences have not only strengthened my technical skills but also taught me the value of collaboration and effective communication within a development team.

Junior Software Engineer

CenterBox Solutions

Dec 2022 - Present (11 months)

Education

Ecole Supérieure des Technologies Avancées et de Management Bachelor's degree, Computer Science

Sep 2019 - July 2022

Skills

• HTML5 • Next.js • MySQL • React • Back-End Web Development • MongoDB • GitHub • JavaScript • Node.js • RESTful APIs • MySQL • Chrome DevTools • Git
